Box board. New box board from straw, 342(C)
Brode, Wallace R.: Materials, 81
Buckley, Oliver E.: Possible and probable future developments in communication, 58

Calibration. Field-intensity standards at very-high frequencies, 193(N)
Camouflage. Color problems in camouflage, 642(C)
Campbell, Ashley S.: Thermodynamic properties of reactive gas mixtures, 437
Centennial of engineering, 1952, 205(C)
Chandler, Albert: Benjamin Franklin's "magical square of 16", 415
Chart for microchemical analysis, 642(C)
Chemistry in the twentieth century (Urey), 23
Chloromycetin used to treat influenzal meningitis, 315(C)
Chronograph. New spark chronograph and chronoscope, 385(N)
Chronoscope. New spark chronograph and chronoscope, 385(N)
Circuit synthesis. Frequency-coordinate vector diagram (Ordung and Krauss), 343
Cleaning. Dry cleaning powder, 606(C)

Cold weather boot, 472(C)
Color. New electronic device facilitates color measurement, 207(C)
Color problems in camouflage, 642(C)
Communications. Noise figure standards, 539(N)
Possible and probable future developments in communication (Buckley), 58
Complex frequencies. Frequency-coordinate vector diagram (Ordung and Krauss), 343
Compressibility studies on polymers, 467(N)
Computers. Advanced time scale analog computer, 488(C)
New RCA electronic computer aids U. S. air defense, 313(C)
Condon, E. U.: Basic standards in science, 103
Conservation. Protection and conservation of the water resources of Pennsylvania (Draemel), 323
Controlled mechanisms. Homeostasis in the individual and society (Wiener), 65
Cosmic ray mystery held near solution, 409(C)
Cosmic rays (Swann), 120
Coulson, Thomas: The Journal of The Franklin Institute: its first one hundred and twenty-five years, 1
Crucibles. Gem-like sapphire laboratory crucibles, 472(C)
Crystals. Progress of the physics of solids (Seitz), 156
Culture dish permits four simultaneous tests, 569(C)
Currency. Electronic counting of paper money, 644(N)

Danforth, W. E.: Thoria as a cathode emitter, 515
Dictation system. Remote control dictation system announced, 312(C)
Dilatometry. Volume dilatometry, 270(N)
Distribution of particle sizes. The goodness of fit and the distribution of particle sizes (Kottler), Part I, 499; Part II, 617
Draemel, M. F.: Protection and conservation of the water resources of Pennsylvania, 323
Drenick, R.: The perturbation calculus in missile ballistics, 423
Drucker, D. C. and F. Edelman: Some extensions of elementary plasticity theory, 581
Dry cleaning powder, 606(C)
Durability. New laboratory for durability studies of protective coatings, 540(N)

Eclipse. Alaskan eclipse expedition, 469(N)
Edelman, F. and D. C. Drucker: Some extensions of elementary plasticity theory, 581
Eisenbud, Leonard: On the theory of angular correlation phenomena, 231
Electric furnace. Melting furnace, 569(C)
Electrolysis. The Tinsley single unit pen recording polarograph, 358(C)
Electron diffraction studies of etched Au leaf films (Stauder and Weber), 351
Electron gun. Midget HV electron gun, 208(C)
Electronic computer. Advanced time scale analog computer, 488(C)
New RCA electronic computer aids U. S. air defense, 313(C)
Electronic counting of paper money, 644(N)
Electronics. New electronic device facilitates color measurement, 207(C)
Radio attachment eliminates commercials, 606(C)
Some prospects in the field of electronics (Zworykin), 69
Epstein, Herman: Solution of transients in active four-terminal networks, 607
Exposure. A new all-purpose exposure suit, 642(C)

Facsimile. High-speed, long-distance facsimile system, 384(C)
Field-intensity standards at very-high frequencies, 193(N)
Filter paper. A glass fiber filter paper, 358(C)
Filtered air. Ionization control makes indoor air like outdoor air, 538(C)
Fire-control system for anti-aircraft artillery, 675(C)
Fog-proof electric camera, 566(C)
Food. Better nutrition for more people (Sherman), 93
Footwear. A new cold weather boot, 472(C)
Franklin, Benjamin. Benjamin Franklin's "magical square of 16" (Chandler), 415
The Franklin Institute

Franklin's electrical machine, 188(C)
Free-piston power plant, 538(C)
Freeze drying, 262(C)
Fur. False fur fashioned from nylon, 414(C)
Future developments in science and technology. See *Science and Tomorrow*

Gas analysis. Absorption of oxygen by alkaline pyrogallol, 271(N)
Gas generators. A revolutionary free-piston power plant, 538(C)
Gas mixtures. Thermodynamic properties of reactive gas mixtures (Campbell), 437
Gasketed loom-motor starter, 358(C)
Glass. A glass fiber filter paper, 358(C)
Glass valves for vacuum control, 643(N)
Gold leaf. Electron diffraction studies of etched Au leaf films (Stauder and Weber), 351
Goodness of fit and the distribution of particle sizes (Kottler), Part I, 499; Part II, 617
Gross, Eric T. B. and Leonard Rabins: Transient analysis of three-phase power systems, Part I, 333; Part II, 521
Guided missiles. The perturbation calculus in missile ballistics (Drenick), 423
Guns. A combination rifle and shotgun, 568(C)

History. The Journal of The Franklin Institute: its first one hundred and twenty-five years (Coulson), 1
Homeostasis in the individual and society (Wiener), 65
Hudson Bay expedition. Cosmic ray mystery held near solution, 409(C)
Hunsaker, J. C.: Aeronautics, 48

Illumination. Modeling with light (Moon and Spencer), 453
Simplified interflection calculations (Moon and Spencer), 215
Industrial television. Television in service of science and industry, 676(C)
Influenzal meningitis. Chloromycetin used to treat influenzal meningitis, 315(C)
Ionization control makes indoor air like outdoor air, 538(C)

Jet engines. Apparatus for studying temperature-sensing devices in jet engines, 191(N)
Journal of The Franklin Institute, The: its first one hundred and twenty-five years (Coulson), 1

Kettering, Charles F.: Future developments in transportation, 109
Kottler, F.: The goodness of fit and the distribution of particle sizes, Part I, 499; Part II, 617
Krauss, Herbert L. and Philip F. Ordung: Frequency-coordinate vector diagram, 343

Lead-calcium storage batteries, 487(C)
Leather. Sampling of upper leather for shoes, 387(N)
Lee, F. B.: Our new aerial highways, 209
Library. High-speed, long-distance facsimile system, 384(C)
Lifeboats. A radio-controlled lifeboat, 568(C)
Lighting. Modeling with light (Moon and Spencer), 453
"Lopsided atom" theory, 208(C)

Magical squares. Benjamin Franklin's "magical square of 16" (Chandler), 415
Malkin, I.: Stress analysis of a hemispherical pressure vessel head under concentric line loads, 247
Management. Industrial supervisory aptitude tests, 472(C)
Maps. A new hand operated map reproduction device, 489(C)
Mass spectrometer. New weather-forecasting techniques with G-E analytical mass spectrometer, 570(C)
Materials (Brode), 81
Materials handling. Increasing productivity in old plants through modern materials handling (Pantas), 491
Mathematics. Benjamin Franklin's "magical square of 16" (Chandler), 415
Trends in analysis (Morse), 33
Measurement. Basic standards in science (Condon), 103
Diaphragm-type micromanometer with electronic pick-up, 189(N)
Equipment measures roll temperature without touching surface of roll, 488(C)
Melting furnace, 569(C)
Microbiology. Bacteriology, 208(C)
Microchemistry. Chart for microchemical analysis, 642(C)
Micromanometer. Diaphragm-type micromanometer with electronic pick-up, 189(N)
Microscopy. Televised microscopy, 411(C)
Military research. Research and development in the Department of Defense, 563(C)
Missile guidance. The perturbation calculus in missile ballistics (Drenick), 423
Modeling with light (Moon and Spencer), 453
Moon, Parry and Domina Eberle Spencer: Modeling with light, 453
Simplified interflection calculations, 215
Morse, Marston: Trends in analysis, 33
Motor starter, Gasketed loom-, 358(C)

Networks. Frequency-coordinate vector diagram (Ordung and Krauss), 343
Solution of transients in active four-terminal networks (Epstein), 607
Noise figure standards, 539(N)
Nomographs. Simplified interflection calculations (Moon and Spencer), 215
Nuclear physics. On the theory of angular correlation phenomena (Eisenbud), 231
Nucleonics. New super counter shown at nuclear exhibit, 207(C)
Nutrition. Better nutrition for more people (Sherman), 93
Nylon. False fur fashioned from nylon, 414(C)

Ordung, Philip F. and Herbert L. Krauss: Frequency-coordinate vector diagram, 343
Orientation effects. Electron diffraction studies of etched Au leaf films (Stauder and Weber), 351
Oxygen. Absorption of oxygen by alkaline pyrogallol, 271(N)

Pantas, Leo J.: Increasing productivity in old plants through modern materials handling, 491
Paper money. Electronic counting of paper money, 644(N)
Particle size. The goodness of fit and the distribution of particle sizes (Kottler), Part I, 499; Part II, 617
Perturbation calculus in missile ballistics (Drenick), 423
Phosphates. Extracting uranium from phosphates, 567(C)
Photo theory. Macroscopic sensitometry, opacity and photographic density, specular and diffuse (Silberstein), 359
Paucity of quanta rendering a silver halide grain developable (Silberstein), 263
Photographic emulsions. Macroscopic sensitometry, opacity and photographic density, specular and diffuse (Silberstein), 359
Photographic methods of uranium determination, 567(C)
Photography. Fog-proof electric camera, 566(C)
Modeling with light (Moon and Spencer), 453
Photometry. Simplified interflection calculations (Moon and Spencer), 215
Physics. Twentieth century physics (Rabi), 44
Plastic boats, 570(C)
Plasticity. Some extensions of elementary plasticity theory (Edelman and Drucker), 581
Platinum. Precision platinum thermometer for high temperatures, 568(C)
Pliotherm, 489(C)

Polarography. The Tinsley single unit pen recording polarograph, 358(C)
Polymers. Compressibility studies on polymers, 467(N)
Portable television camera, 664(C)
Power systems. Transient analysis of three-phase power systems (Gross and Rabins), Part I, 333; Part II, 521
Predictions in science. See *Science and Tomorrow*
Pressure vessels. Stress analysis of a hemispherical pressure vessel head under concentric line loads (Malkin), 247
Protective coatings. New laboratory for durability studies of protective coatings, 540(N)

Quantum mechanics. On the theory of angular correlation phenomena (Eisenbud), 231
Quantum theory of exposure. Macroscopic sensitometry, opacity and photographic density, specular and diffuse (Silberstein), 359
Quantum theory of sensitivity. Paucity of quanta rendering a silver halide grain developable (Silberstein), 263

Rabi, I. I.: Twentieth century physics, 44
Rabins, Leonard and Eric T. B. Gross: Transient analysis of three-phase power systems, Part I, 333; Part II, 521
